01 PIONEER AVIC-Z140BH

Pioneer's flagship AVIC-Z140BT provides everything you want in a system including navigation, entertainment, information, and connectivity features such as HD Radio Artist Experience, iPhone/iPod, Advanced App Mode, and wireless app control via Bluetooth for specific Android devices. It also features a 7-inch WVGA touch-screen display, DVD playback, Dual Zone, built-in Bluetooth (hands-free and music streaming), USB connectivity, SD card slot, back-up camera input, HD Radio tuner, and traffic information. The AVIC-Z140BH is available for the suggested price of \$1,200. Pioneer.com

02 MOTEC PLUG-IN DASH LOGGER KITS

MoTeC is excited to announce the immediate availability of its new Club Dash Logger, the CDL3, and two plug-and-play kit solutions based around this programmable display and data logger. These CDL3 track kits package together professional-quality components including shift lights, buttons, GPS, and high-quality wiring with plug-in power, all at an entry-level price. Customers can choose between a CDL3 Track Logging Kit, complete with BMB logging and MoTeC's renowned i2 data analysis software. Motec.com.au

03 QUAIFE HONDA CR-Z LIMITED-SLIP DIFFERENTIAL

Making a substantial horsepower gain with simple bolts is becoming increasingly difficult on late-model applications like the Honda CR-Z. One way to maximize your existing power is to install a Quaife Automatic Torque Biasing differential. The Quaife QDF9U ATB differential drastically improves the dynamics of the Honda CR-Z by reducing front tire slip, decreasing understeer, and improving front traction during acceleration. Available exclusively through Motovicity Distribution. QuaifeSD.com

04 CARBONETIC CARBON-BLADE CLUTCH

These OEM-compatible carbon-blade clutches are a great upgrade for your modified street-driven car. They exceed the performance of any metal or organic clutch with their extreme resistance to fading, and they are rated for vehicles producing up to 450 hp. Carbon-blade clutches from Carbonetic work with OEM-type covers and flywheels or Carbonetic covers and lightened flywheels. For the ultimate in street and light track performance, look no further. Carbonetic.net

05 COVERKING BESPOKE CAR COVERS

Custom car cover manufacturer Coverking is launching a new program for owners of ultrarare or super-customized vehicles, allowing them to protect their personalized investment with a perfect-fitting, custom-made cover a mere week from the date of measure (additional travel charges apply outside of the Southern California area). A variety of fabrics and colors are available to choose from, as well as custom piping, embroidery, and logos. Now, through Coverking's Bespoke program, any custom or rare machine can have the protection it deserves, no matter how unusual its shape. Coverking.com
